

Postmix bi11

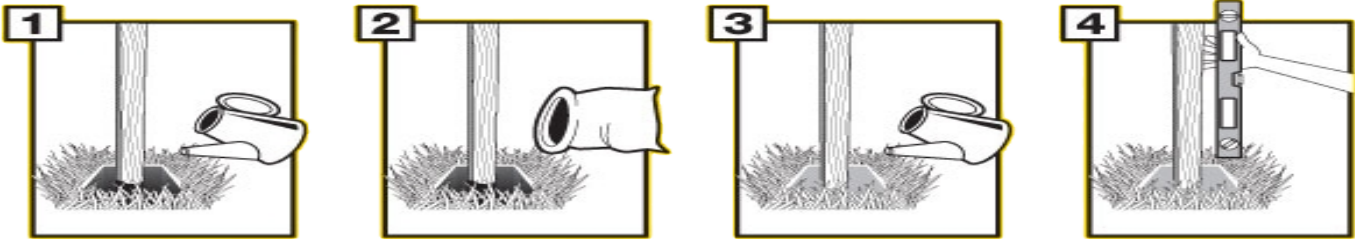

Postmix is a rapid setting concrete for securing metal, wood and concrete posts.

Ready to use. No Mixing is required. Sets in 5 to 10 minutes. Finished job within hours

- Store on-site in all weathers
- No need to cover
- Stronger more durable 20kg sacks
- Reduces waste and damage resulting in cost saving
- Non slip bags
- Cleaner and safer handling

- Dig hole to required size, half fill hole with water and place post in hole.
- The Postmix is already pre-mixed, simply empty the Postmix straight into the hole uniformly around the post until the powder reaches the water level.
- Top up with water if necessary, use a stirrer to release any air trapped in the powder.
- Adjust the post into position and support until the Postmix sets usually in 5 minutes, but in colder weather this may take longer.
